Education

Dwarkadas J. Sanghvi College of Engineering, Mumbai

Aug 2023 – Present

B.Tech in CSE (Data Science), Honours in Computational Finance

CGPA: 8.97

V. G. Vaze College of Arts, Science and Commerce, Mumbai

Aug 2021 – May 2023

Higher Secondary Education (Science)

Technical Skills

Programming: Python, JavaScript, TypeScript, Java, C, C++

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap, shadcn/ui

Backend: FastAPI, Flask, Node.js, Express.js, REST APIs, WebSocket, Authentication

Databases: PostgreSQL, MySQL, MongoDB, Firebase, Supabase, Neo4j, Prisma ORM, SQLAlchemy

AI/ML: LLMs, RAG Pipelines, Multi-Agent Workflows, NLP, Vector Embeddings, Semantic Search, Prompt Engineering,

ML Frameworks: PyTorch, Hugging Face Transformers, LangChain, Sentence-Transformers

DevOps & Platform:: Git, GitHub, Docker, Docker Compose, Linux, Nginx, CI/CD, Redis, Celery, VPS Deployment

Experience

NainFit.ai (Nainsense Labs Pvt. Ltd.)

Mumbai, India

AI Engineering Intern

Feb 2026 – Apr 2026

- Built an LLM-powered healthcare assistant for symptom analysis and preliminary diagnosis support.
- Collaborated on API testing, UI flows, and integration scenarios across frontend and backend services.
- Automated structured medical reports, reducing consultation preparation time by **60%**.
- Built OCR + NLP pipelines with Celery workers, improving medical data retrieval accuracy by **40%**.
- Deployed cloud-native FastAPI/Next.js stack on Hetzner VPS using Docker Compose, Nginx, Redis, and PostgreSQL.
- **Stack:** Python, FastAPI, Next.js, Docker, Nginx, Redis, Celery, PostgreSQL, OCR, LLMs

Projects

LitAgent — Multi-Agent Autonomous Research System | [Project Link](#)

- Built an autonomous platform to analyze research papers, benchmarks, and technical literature.
- Designed a RAG pipeline with PDF parsing, semantic retrieval, citation expansion, and API-backed workflows.
- Implemented knowledge graph generation and contradiction detection using Neo4j and vector embeddings.
- Developed an agentic “LLM Council” to validate insights and generate high-confidence reports.
- **Stack:** Next.js, Tailwind CSS, FastAPI, Firebase, Neo4j, Groq, Gemini, Sentence-Transformers

VoiceHire AI — Real-Time Voice Interview Simulator | [Project Link](#)

- Built a real-time voice AI interview simulator for placement preparation and mock interviews.
- Implemented WebSocket streaming, FastAPI session handling, transcription, and real-time API workflows.
- Used LangChain for LLM orchestration across interview flow, context tracking, and responses.
- Integrated Llama-3.3 via Groq API for contextual interview questions and AI feedback.
- **Stack:** Next.js, FastAPI, WebSocket, LangChain, PostgreSQL, Prisma, AssemblyAI, Groq API

Fincognia — AI Financial Assistant for Gig Workers | [Project Link](#)

- Built an AI finance assistant for budgeting, credit tracking, and financial planning.
- Designed adaptive budgeting modes for volatile income using AI-generated insights.
- Used Hugging Face model deployment for Money Weather cash-flow forecasting.
- Developed AI agents for loan readiness, insurance discovery, and tax assistance.
- **Stack:** Next.js, React, Firebase, Hugging Face, Groq SDK, SerpAPI, Tailwind CSS, Three.js

Achievements

5× Hackathon Winner — Hackxios 2026 — Hawkathon 2026 — Hackniche 2026 — DATATHON 2026 (Core ML) — HACKANOVA 5.0

Extracurricular

Web Development Head, DJS NOVA

Aug 2023 – Present

Led web development for committee events, building event platforms and a QR-based validation system for access control and participant tracking.
